

1. Minimum of 10+ samples
2. Data must all be within the last 10 years
3. Surface water samples only (i.e. less than 3 meters in depth)
4. Only EPA accepted analytic methods
5. Only one value per WID per day
6. Multiple samples from the same station are averaged if they are taken on the same day. If there are samples taken at different within the same WID, take the maximum value.
